

Chest X-Ray Report

Examination Date: March 16, 2025

Examination

Chest X-Ray PA and Lateral Views

Clinical History

Annual check-up, no specific symptoms

Technique

Standard PA and lateral chest radiographs were obtained

Findings

Heart size and mediastinal contours are within normal limits. Lungs are clear without focal consolidation, effusion, or pneumothorax. No pleural abnormalities. Visualized bony structures show no acute abnormality.

Impression

Normal chest X-ray. No acute cardiopulmonary process.
